---

Graduate of Software Engineering.

I'm a passionate developer who excels in both Frontend and Backend technologies.

During the study, I had the honor to receive 4 Certificates of Excellence.

Education:

2017-2021	**B.Sc. Software Engineering;** SCE-Shamoon College of Engineering. **GPA – 95.**
2011	I finished high school. Full matriculation Certificate. **Major in Information Systems.**

Practical experience and external courses during studies:

- multi-threading java projects.
- The Complete 2020 Web Development Bootcamp.
- Client-server web applications.

Relevant Projects

2020 – 2021	Writer verification – Final Project (Grade:94) A system for Authorship verification in manuscripts. Done by creating a neurons network model with methods of deep learning. The model is written in Python with Keras, Tensorflow, CV2 packages and more. Written in JavaScript, Html, CSS, with Node.js for backend and MongoDB as database.
2021	Smart Brain A fully web application built using React.js and Redux.js as frontend, and Node.js, Express.js and PostgreSQL as backend and database. It uses a machine learning API called 'Clarifai' to detect faces from images submitted via an input form.

Military service:

2011-2014	Events supervisor in the Israel Defense Force (Tze'elim base).

Additional skills:

- Good Knowledge: JavaScript, Node.js, Express.js, Redux, React, C++, C, Python, Java, C#, jQuery, HTML, CSS3, Bootstrap, MongoDB, SQL, PostgreSQL.
- Operation systems: Windows, Linux.
- Good interpersonal skills and ability to work in a team.

Languages:

- Hebrew - Native proficiency.
- English - Highly proficient in spoken and written.
